Do you mean the Education workgroup? The last I heard from her she is now landing at 8 AM, so assuming she's not delayed she should be there.

Hey Brandon!

Are we meeting sans Trina? I think the calendar invite is when she is in the air. I thought we were meeting in the afternoon no?

I don't think I ever responded to this, but thank you for your flexibility, Dylan. Very much appreciated - I know we're slowly taking over your life!

I was going to go to the NRC workshop, but you could tear me away from that for this. I'll see if I can get someone to cover for me.

My flight doesn't land until 8 am that day. I could meet at 4 pm.

Subject: finding a day/time for Measurement WG conversation at Resource Recycling

Hi Dylan and Trina –

Debra, Swarupa, and I are trying to hone in on the ideal day/time for the Measurement workgroup to meet at Resource Recycling. We are hoping to use this time to do some in-person brainstorming on the recycling system map and sketch it out in a bit more detail. Since the two of you have provided some very valuable input on this already, we want to try to have this conversation at a time both of you will be in New Orleans and available, and then once we've settled on a day/time/location we can send an invite to the workgroup more broadly.

Based on when the other workgroups are meeting, the best options right now look to be 8-9 AM or 4-5 PM on Monday (8/26). The latter overlaps with the NRC Market Development workshop (not sure if either of you plan to attend that, but something to consider if you are). If neither of those work for all of us, we would probably need to find a time on Tuesday that we could sit down in a quiet corner of a hotel (mine at least has a couple of rooms that could be used) and sketch this out.

Do 8-9 AM or 4-5 PM on 8/26 work for either of you? If not, is there a time on Tuesday that would work?

Thanks,
-Brandon
